

What is WebTitan?

WebTitan is a web filtering solution which allows you to monitor, control and protect your business and users from online threats. Highly scalable, functionality rich, easy to deploy and manage, it is designed to provide the best possible protection for your organisation when online.

Content control and malware protection for your business. The internet is a critical business tool. Unfortunately, malicious websites, phishing, spyware, and viruses present real threats to the business that just can't be ignored. There is an absolute need for companies to scan and filter internet traffic in order to protect their employees, business and data or cut down on bandwidth costs.

WebTitan protects organisations from threats by managing the organisations internet traffic. It can regulate the content employees can access, protect the network from malware and malicious attacks and control bandwidth usage.

Why use WebTitan?

WebTitan is designed to fit easily and seamlessly into your existing network infrastructure.

The solution allows the administrator to simply create granular internet usage policies and apply these to your users and groups in line with your organisations Internet Usage Policy.

WebTitan contains a comprehensive built-in reporting suite. With over 50 pre-defined reporting options plus a customisable report builder, WebTitan allows you create, view and automate reports on every element of the use of the internet in your organisation.

Who uses WebTitan?

- » Businesses who want to protect their users and their network from dangerous or inappropriate websites.
- » Educational institutions who want to stop students and staff from accessing websites containing unsuitable content.
- » Government departments that want to protect their users and network or cut down on bandwidth costs.

WebTitan is a comprehensive web filtering appliance that is designed to fit easily into your existing network infrastructure.

Product features

Deployment

WebTitan can be deployed as a gateway solution or hosted in the cloud. The gateway solution is run on your own hardware or in a virtual environment, offering more granularity and control. The cloud based solution is simple to set up and allows you to mitigate risk when browsing online in four simple steps.

Antivirus protection

WebTitan includes the award winning Clam antivirus engine, which is auto updating guaranteeing minimal management and utmost protection.

URL filtering

WebTitan filters website URLs into 53 predefined categories such as social media, news, pornography, gambling etc. The system contains over 500 million website addresses in 200 languages, each sorted into the predefined categories. Users are guaranteed highly accurate and flexible filtering based on the website's content.

Flexible policy creation

Using WebTitan you can easily create and manage multiple browsing policies to protect your users. The solution allows you to divide users into groups and dictate which browsing policy applies to each group of users.

This functionality allows the administrator to apply more / less stringent policies depending on the group of users.

Malware & phishing protection

Protect your network from malware and phishing attacks with WebTitan's categories of malware protection. WebTitan will block access to compromised websites, malicious websites, spam based websites and spyware.

Reporting

Customers have access to a full suite of predefined reports on user or group activity. Real time browsing activity can also be viewed.

Web based User Interface

WebTitan can be securely accessed online which allows the administrator to easily access and manage their policies and generate reports.

About TitanHQ

TitanHQ is a software development company that develops security software for business. Our gateway and cloud based products offer protection for business against the modern threats that businesses face from email and Internet usage. Our goal is to simplify the intricate world of internet security for our customers.
