

Avira ANTIVIRUS PRO

Premium protection for PC, Mac, and Android.
Incl. universal 5-device license

Globally, Avira security solutions protect over 500 million devices securely and reliably against viruses, phishing sites, ransomware & other malicious websites. They are also easy to install and a breeze to use.

Driven by the idea of a worry free online life, Avira has offered first-class German-engineered antivirus technology for over 30 years. As a global leader in the use of cutting-edge AI and machine-learning technology, Avira utilizes this expertise to provide integrated protection. This involves comparing millions upon millions of datasets in the cloud to detect threat patterns in real time and protect users from danger.

Avira Antivirus Pro protects your confidential banking information, safeguards you against online attacks, and ensures you always know what your security status is and can control it at any time.

Award-winning software – Made in Germany and recommended by security experts.

The best antivirus – and we're not the only ones to say so

Avira Antivirus Pro constantly receives top scores for malware detection, low system impact, user friendliness, as well as repair and self-defense functions. In renowned tests by Virus Bulletin, AV-Test, and AV-Comparatives Avira products leave their international competitors trailing, scooping countless test victories and awards.

Avira Connect: Overview of all devices

Avira Connect provides you with state-of-the-art protection. Security status checks, smartphone tracking, license management – the free Avira Web Console lets you manage all your devices centrally via the Internet, simplifying your digital life.

- Security status: Get an overview of your latest scan results.
- Display helpful system information: Memory utilization, disk space use, hardware configuration.
- See an overview of what apps you've got installed, and easily add further security apps.
- Manage your friends' and family's devices if they want and agree.
- Receive alerts if your or your contact's email account falls victim to an attack.
