

# G DATA MOBILE INTERNET SECURITY

## WORRY-FREE PROTECTION WHILE ON THE MOVE FOR YOUR ANDROID® SMARTPHONE OR TABLET

Quickly buying T-shirts via a tablet, downloading a recipe for the evening meal and using a smartphone to check emails and Facebook – but that’s not nearly all. Who would have thought five years ago that we would be monitoring our health with a watch or would be able to protect our homes with our

telephones? Who would have predicted that our mobile devices would one day be giving us shopping tips or enable completely new possibilities for using media?

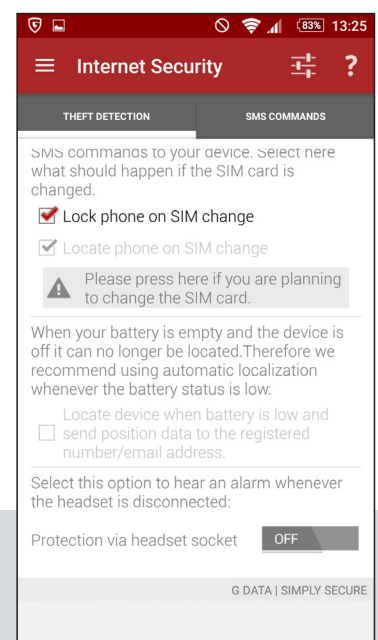

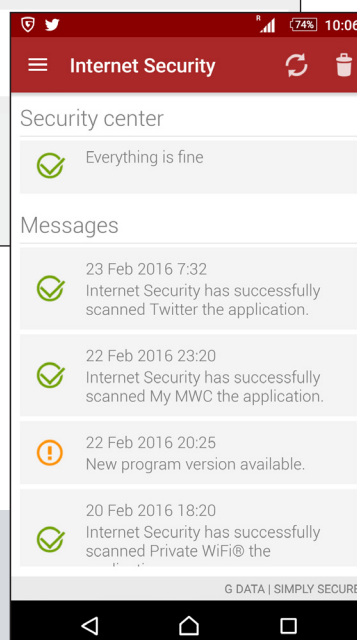

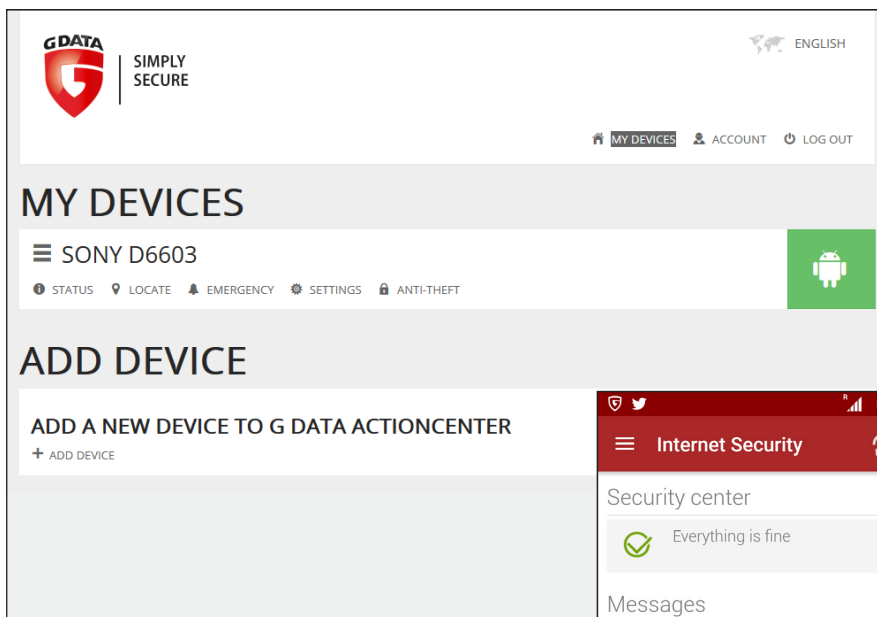

And who would have dreamt that an entire generation would never own a desktop PC and would never bother

subscribing with a cable provider? Five years ago, the mobile revolution was still in its infancy; today it is growing at a rapid rate and nobody knows if and when it will stop.

G DATA Mobile Internet Security makes the internet a safe and care-free place and keeps you protected from data thieves – so you can do all the things on your Android device that this exciting digital world has to offer.

With G DATA at your side, security in your online life is not a luxury anymore.

## ALL-ROUND PROTECTION FOR YOUR ANDROID® SMARTPHONE OR TABLET

<b>Surf- and phishing protection</b>	Dangerous and fake websites are detected and blocked immediately – for safe banking and shopping ‘on the go’
<b>Malware scanner</b>	No malicious software for your Android device: constant protection from all threats at all times through our cloud-connected malware scanner
<b>Theft protection</b>	Remotely lock or wipe a device if the SIM is replaced
<b>Location &amp; Alarm</b>	Find a lost or stolen device over the internet
<b>App control</b>	Monitoring of app permissions to make sure that you are safe and your device is not being spied upon
<b>Parental controls</b>	You decide which websites your children can access
<b>Usage monitoring</b>	Decide which apps your children can use and when
<b>SMS &amp; Call Filter</b>	Block unwanted calls and only talk to people you trust and be protected from unwanted text messages
<b>Private contacts</b>	Hide important contacts in a password-secured area – all data such as calls logs and text messages will only be accessible to you
<b>Password protection for apps</b>	Protect selected apps with a password and block unwanted access, prevent excess data usage and expensive in-app purchases

## ADDITIONAL G DATA MODULE

For added comfort in your mobile online life you can use the G DATA VPN module (paid upgrade/cancellable monthly). The VPN module is also available for our free “Light” version of G DATA Mobile Internet Security. At present, the VPN module is only available for the Android version of G DATA; it will be available shortly for iOS devices as well.

G DATA VPN

Wi-Fi is everywhere, in cafés, hotels or airports. Protect your data and your privacy and prevent criminals from reading your data – make sure that your emails, banking details and web history remain private. On top, the G DATA VPN can also be configured to compress incoming and outgoing traffic to save on your data plan’s volume limit.

Includes one 12-month license for 1 mobile device (smartphone or tablet) with hourly virus signature updates, version upgrades and cloud connection.

### System requirements

G DATA Mobile Internet Security is available for Android devices running Android 4.0 or higher.

Android is a trademark of Google Inc. Use of this trademark is subject to Google Permissions.
